

SHEARGLIDE® 108 VO Vanishing Oil

Description

Shearglide® 108 VO is true vanishing oil in that any film left behind is imperceptible.

Shearglide® 108 VO is light-bodied and solvent based unique formulation designed to provide lubricity on mild metal forming and stamping operations. It includes a volatile carrier that evaporates quickly and cleanly.

Shearglide® 108 VO's low odor translates into excellent operator acceptance.

Typical Properties

Property	Results
API Gravity @ 60°F	54.1
Specific Gravity @ 70°F	.76
Flash Point, TCC, °F	> 125
Boiling Point, °F	370

Features/Benefits

- ✓ **Low Odor**
Excellent operator acceptance.
- ✓ **Solvent Based**
Imperceptible film that reduces post-process washing requirements.
- ✓ **Versatile**
Acceptable for use on both ferrous and non-ferrous metals.
- ✓ **Improves Operation Efficiency**
Well-suited for use where post-stamping and -forming cleaning of parts is undesirable.
