

Protec CDF 910

Alkaline Multi-Metal Cleaner

Biodegradable Concentrate

Description

Protec CDF 910 is a parts washing concentrate for aluminum, cast iron and steel parts and systems. It is formulated to remove grease, oil, uncured coatings and dirt in spray wash cabinets, parts washers, soak tanks and agitation tanks. **Protec CDF 910** can also be used as a sump cleaner when added to coolant systems.

Protec CDF 910 has been formulated to be compatible with multiple metal substrates, making it a highly versatile cleaner. It may be heated up to 170° F to expedite cleaning.

Physical Properties

Property	Results
Part Number	4910
Appearance	Amber Liquid
pH—Undiluted	12.5
pH—1% Solution	11.5-11.9
Odor	Mild
Flash Point	Not Flammable
Corrosion Protection	Short Term
Density	8.46 lb/gal

Application Information

Application Type	Concentration
Light Soils	2 - 4%
Medium Soils	4 - 6%
Heavy Soils	6 - 15%
<i>Consult with your U.S. Lubricants Specialist for application specific recommendations</i>	

Features/Benefits

- ✓ **Special wetting agents improve soil penetration, resulting in better cleaning**
- ✓ **Water conditioning additive More effective cleaning and rinsing of parts**
- ✓ **Biodegradable More environmentally friendly**
- ✓ **Contains No Caustic Soda More user friendly**
- ✓ **Emulsification Package Soils release from the surface more effectively**
- ✓ **Foam Control No foam build up in operation**
