

Protec CDF 915 Medium-Duty Cleaner

Description

Protec CDF 915 is a medium-duty parts washing concentrate for aluminum, cast iron and steel parts and systems. It is formulated to remove coolants, oils and manufacturing debris during the manufacturing and assembly of ferrous and non-ferrous parts.

Protec CDF 915 leaves no measurable build-up to interfere with assembly. The product is also effective as a rinse sump additive to help maintain corrosion resistance during assembly.

Protec CDF 915 has been formulated to be compatible with multiple metal substrates, making it a highly versatile cleaner. It may be heated up to 170° F to expedite cleaning.

Features/Benefits

- ✓ **Special Wetting Agents**
improve soil penetration, resulting in better cleaning
- ✓ **Water Conditioning Additive**
More effective cleaning and rinsing of parts
- ✓ **Biodegradable**
More environmentally friendly
- ✓ **Contains No Caustic Soda or Solvents**
More user friendly and cleaner air
- ✓ **Emulsification Package**
Soils release from the surface more effectively
- ✓ **Foam Control**
No foam build up in operation

Physical Properties

Property	Results
Part Number	4915
Appearance	Amber Liquid
pH—Undiluted	12.5-13 pH
pH—1% Solution	11-11.5 pH
Odor	Mild
Pounds per Gallon	8.46
VOC%	.06 Lbs. per Gallon
Flash Point	Not Flammable
Corrosion Protection	Short Term
Biodegradable	Yes
