

Protec CDF 920 Heavy Duty Cleaner

Description

Protec CDF 920 is a parts wash for aluminum, cast iron and steel part for Metal Fabricators, Truck and Auto Repair Rebuilders that require clean rust free metal parts. In the past cleaners with a high caustic soda content were used to overpower contaminants on metal assemblies and engine parts clean. With manufacturers turning to combinations of steel and aluminum for its assemblies' strong caustic formulas are no longer appropriate.

Protec CDF 920 cleans all truck and automotive metal parts safely without additions of other harsh or expensive chemicals. It is a great choice for aluminum, steel and cast iron engine blocks, heads and valves.

Protec CDF 920 can be heated - 135°F to 175°F to speed up cleaning and drying.

Features/Benefits

- ✓ **Special Wetting Agents**
improve soil penetration, resulting in better cleaning
- ✓ **Water Conditioning Additive**
More effective cleaning and rinsing of parts
- ✓ **Biodegradable**
More environmentally friendly
- ✓ **Contains No Caustic Soda or Solvents**
More user friendly and cleaner air
- ✓ **Emulsification Package**
Soils release from the surface more effectively
- ✓ **Foam Control**
No foam build up in operation

Physical Properties

Property	Results
Part Number	4920
Appearance	Amber Liquid
pH—Undiluted	12-13 pH
pH—1% Solution	10.5-11.9 pH
Odor	Mild
Pounds per Gallon	8.40
VOC%	.34 Lbs. per Gallon
Flash Point	Not Flammable
Corrosion Protection	Short Term Protection
Biodegradable	Yes
