

product data sheet

THRIVE[™] DIESEL Engine Oil High Performance Diesel Engine Oil

Description

THRIVE™ Diesel Engine Oils are heavy duty engine oils designed to meet the demands of on- and offhighway diesel engines requiring mono-grade viscosities. They are formulated with the highest quality additives and base oils allowing them to provide outstanding performance under adverse conditions and surpass the performance of competitive products.

THRIVE™ Diesel Engine Oils have been developed to meet North American and European OEM specifications. They exceed the industry engine performance requirements for API Engine Oil Licensing and Certification System (EOLCS) and have been tested in accordance with the CMA code of practice.

THRIVE™ Diesel Engine Oils offer critical performance benefits including superior control of oil thickening due to soot buildup, excellent ring and linear wear control, excellent bearing wear and corrosion control, superior control of piston deposits and longer engine life.

Features/Benefits

- Superior Control of Oil Thickening Due to Soot Buildup
- Excellent Ring and Linear Wear Control
- ✓ Reduces Bearing Wear
- ✓ Premium Corrosion Control
- ✓ Longer Engine Life
- ✓ Superior Control of Piston Deposits

Physical, Chemical	& Performance Properties

	10W	30	40	50
Product Number	058	061	064	065
Industry Performance Standards	API CF Performance	API CF-2, CF	API CF-2, CF	API CF-2, CF
API Gravity @ 60°F	30.4	27.8	27.5	27.1
Viscosity @ 100°C, cSt	6.5	11.3	15.7	19.4
Viscosity @ 40°C cSt	39.0	94.0	144.0	205.0
HTHS Viscosity cP		3.5	4.6	5.5
Viscosity Index	105	104	105	104
Pour Point °F	-20	-10	0	10
Sulfated Ash % wt., max	0.9	0.9	0.9	0.9
Zinc % wt.	0.13	0.13	0.13	0.13
TBN	7.5	7.5	7.5	7.5
