

PREMIUM SAW GUIDE OIL

Description

Premium Saw Guide Oil is a specialty product designed to provide optimum lubrication of saw guides.

Premium Saw Guide Oil is particularly recommended for the lubrication of arbor bearings and saw guide systems used in cutting lumber.

Premium Saw Guide Oil combines with water for effective saw guide lubrication.

Premium Saw Guide Oil is formulated to provide protection against wear rust and corrosion. Oiliness and tackiness agents provide a strong oil film that reduces friction and resists sling-off during operation. An extreme-pressure additive provides extra protection against saw guide wear.

Premium Saw Guide Oil does not contain any chlorine or heavy metal compounds.

Features/Benefits

- ✓ **Synergistic effect with water cools and lubricates saw to reduce wear and extend guide and blade life**
- ✓ **Good metal-wetting ability**
- ✓ **Protects against rust and corrosion**
- ✓ **Excellent filterability**
- ✓ **Extreme-pressure properties for excellent wear protection**
- ✓ **Resists sling-off**
- ✓ **No Chlorine or heavy metals**

Applications

- ✓ Saw guides
- ✓ Saw ways and gears
- ✓ Arbor bearings

Physical & Chemical Properties

Properties	Premium Saw Guide Oil
Part #	234
ISO Grade	100
Pounds Per Gallon	7.15
Viscosity @ 40°C cSt	100
Viscosity @ 104°F, SUS (ref)	463
Viscosity Index	105
