

AQUAGLIDE® 5726

Heavy Duty Water Soluble Drawing and Stamping Compound

Rev. 1/2024

Description

Aquaglide® 5726 is a low viscosity, water base drawing and stamping compound designed to perform severe drawing, shaving, blanking, and punching operations.

Aquaglide® 5726 is non gummy and easy to clean.

Aquaglide® 5726 is designed for all types of metal including stainless steel and aluminum.

Aquaglide® 5726 can be used neat for very severe applications.

Features/Benefits

- **Versatile**
Can be used on a wide variety of applications.
- **Extendable**
- **In Process RP**
- **Clean Running**
Residue can be removed with Alkaline Cleaner
- **Compatible with Carbide Tooling**

Physical and Chemical Properties

Property	Results
Appearance	Dark Brown
Odor	Slight
Viscosity (Neat)	~86 cSt @ 40
Chlorine	Present
Sulfur	None
Phosphorous	None
Lubricity Agent	Present

Coolant Concentration Information

Light Duty	2-3%
Moderate Duty	4-7%
Heavy Duty	8-10%
Extreme Duty (Severe Deep Draws)	50-100%
Refractometer Ratio	1:1
