

Bar & Chain Oil

Description

Bar & Chain Oil is a premium grade chain saw bar oil. It is separated from conventional products by its superior adhesion properties. This is due to the addition of a unique tackifier additive not contained in most lubricants. The addition of this additive results in less oil slinging off the chain during saw operation and reduced oil consumption. In addition, the base oils in this product have been carefully selected to ensure good performance at low temperature plus they have the ability to dissolve pitch and sap.

Bar & Chain Oil is available in both summer and winter grades.

Performance:

- **Tackiness:** Tackiness additives impart better retention of oil on the chain, bar, and drive sprockets.
- **Wear Prevention:** Effective anti-wear agents reduce wear in the critical areas and optimize the life of the saw and its chain.
- **Cleaning Agents:** Special additives reduce the pitch build-up on the chain and drive sprocket, thereby reducing maintenance and down-time.

Features/Benefits

- **Good adherence**
Reduces throw off
- **Reduces guide bar burning and chain wear**
- **Lower cutting chain temperature**
Teeth remain sharper longer
- **Protects the guide bar and chain from rusting**

Typical Properties		
Product Name	Winter Grade	Summer Grade
Product Code	211	210
Viscosity @ 40° C, cSt	38	100
Viscosity @ 100° F, SUS	180	460
Pour Point ° F	0	15
