

THRIVE® Diesel 20W-50

High Performance Diesel Engine Oil

Description

THRIVE® Diesel 20W50 is a specialty product designed for systems that require the anti-wear protection provided by a heavy duty diesel engine oil, the high temperature viscosity of a SAE 50 and good low temperature fluidity properties.

THRIVE® Diesel 20W50 protects engines from build-up of harmful deposits, sludge, and varnish. It also contains friction fighting agents that reduce wear and extend the life of an engine for years of dependable service.

THRIVE® Diesel 20W50 is formulated with a combination of highly refined mineral oils and a premium additive system. It contains the additive required to meet the performance of API CF-2 and CF. Typical applications are engine oils and hydrostatic fluids.

Features/Benefits

- **Excellent Overall Consistent and Dependable Protection**
- **Helps to minimize the total cost of ownership.**
- **Superior Thermal and Oxidation Stability**
- **Prevents the formation of abrasive engine deposits, sludge and varnish.**
- **High Viscosity Index with Shear Stable Viscosity Modifiers**
- **Provides consistent and dynamic protection for normal and high-stress applications.**
- **Excellent Low Temperature Properties**

Physical and Chemical Properties	THRIVE® Diesel 20W50
Product Number	014
API Gravity @ 60°F	28
Viscosity @ 100°C cSt	19
Viscosity @ 40°C, cSt	180
CCS Viscosity @ -10°C, cP	4500
Viscosity Index	130
Pour Point °F	0
Zinc % wt.	0.1
